2017-2018

ABOUT ME

I am a dedicated Frontend Engineer and UI/UX Designer with a passion for creating seamless and engaging user experiences. My work centers on developing intuitive and responsive web and mobile applications that combine functionality with a strong visual appeal. I focus on delivering high-quality products that not only meet user needs but also enhance their overall experience.

Throughout my career, I've committed to understanding the nuances of user interaction, ensuring that every design decision contributes to a more enjoyable and effective user journey. I am always looking for new ways to innovate and improve, staying current with industry trends to push the boundaries of frontend development and UI/UX design.

WORK EXPERIENCE

Mobile Application Developer

TAJJI LTD | ELDORET   **2024- PRESENT**

As the lead Mobile Application Developer, I have been at the forefront of creating seamless and efficient mobile applications. My primary toolset includes Kotlin Multiplatform, which allows me to write once and run everywhere, significantly reducing development time and effort. I have successfully implemented designs crafted in Figma, ensuring a consistent look and feel across all platforms.

In addition to development, I have taken on the responsibility of testing the application using Acceptance Test-Driven Development (ATDD). This approach has not only improved the quality of our software but also streamlined our development process. It has allowed us to catch bugs early in the development cycle, saving both time and resources.

My role encompasses a wide range of tasks, from conceptualizing and designing the application to writing the code, testing it, and finally deploying it. I am committed to delivering high-quality, user-centric applications that meet and exceed client expectations.

CORE TECHNOLOGIES

- Svelte
- Tailwind CSS
- Figma (for UI/UX design)
- React
- Next.js
- Vue
- JavaScript
- TypeScript
- Kotlin Multiplatform
- GraphQL
- Git

Frontend engineer - Intern   AUGUST - DECEMBER 2023

TAJJI LTD | ELDORET

During my tenure, I have been actively involved in creating engaging and user-friendly digital experiences. I have successfully built responsive landing pages and Progressive Web Applications (PWAs) using advanced technologies such as SvelteKit, Tailwind CSS, and TypeScript. My proficiency in these areas has enabled me to deliver high-quality code that adheres to best practices and industry standards.

Beyond my coding skills, I have significantly contributed to the UI/UX design process using Figma. This has empowered me to create intuitive and visually appealing interfaces that enhance user interaction and overall user experience. I have a knack for translating user needs into functional designs and ensuring that the final product aligns with business objectives.

UI/UX Designer   FEBRUARY-MAY 2024

10xbeast - Remote

As a freelance UI/UX Designer at 10xbeast, an AI-powered email marketing platform, I played a key role in shaping the user interface and experience of the product. My work involved crafting designs in Figma that aligned with user goals and business objectives. By focusing on usability and visual clarity, I helped the platform offer businesses an intuitive way to create effective marketing emails using AI, contributing to the product's success in a competitive market.

Frontend engineer   NOVEMBER - fEBRUARY 2024

Golden Heart Nursing - Remote

At Golden Heart Nursing, where I served as a Frontend Developer, I was responsible for building their web presence using SvelteKit, TypeScript, and Tailwind CSS. I developed a highly responsive and user-friendly website that enhanced accessibility for their healthcare staffing services. My work ensured that the website was not only visually appealing but also functionally robust, providing users with a smooth and engaging experience that reflected the professionalism and care offered by Golden Heart Nursing.

SKILLS

- Experienced in Android and iOS development using Kotlin Multiplatform, enabling efficient cross-platform application development.
- Versed in Kotlin for multiplatform development, showcasing my ability to create versatile applications across platforms.
- Proficient in UI/UX design using Figma, allowing me to craft intuitive and visually appealing interfaces that enhance user experience.
- Skilled in developing websites and web applications using SvelteKit, Tailwind CSS, TypeScript, React, and Next.js, demonstrating my ability to work with modern web technologies and frameworks.
- Currently expanding my skill set by learning Vue, aiming to broaden my expertise in popular JavaScript frameworks and further enhance my frontend development capabilities.
- Committed to continuous learning and improvement, actively seeking opportunities to apply new technologies and methodologies in real-world projects.
